

Lock On Your Profit

NUUO Retail Solution aims to be simple to use, easy to install, yet complete with features to directly combat retail shrinkage. With many connectivity options and easy POS integration, NUUO Retail Solution also offers additional features like gigapixel video coverage and advanced video analytics that provides useful information like customer conversion rate and traffic changes. You can expect ROI in as quick as 6 months!

Precise Detection

Experience accurate, precise video analysis with NUUO IVS. With image resolution requirement as low as NTSC (352 X 240) standard, almost any surveillance camera can be used as an intelligent profit analyst.

Broad Camera Support

NUUO IVS is installed on server side. This means no matter what camera you use, the video analytics function is always ready, always available. Supports over 2000 cameras from 120 makers.

POS Shrink Detection

NUUO Retail Solution works with many POS vendors such as Micros, NCR, Gilbarco, and Epicor to bring you the ultimate POS detection system designed to detect, alert, and record suspicious POS transactions from all store locations. You can also easily review videos with advanced POS search and report tools.

Advanced Video Analytics

Easily turn your existing cameras into a valuable business tool. Using NUUO IVS, you can find out each individual store location performance. Easily monitor customer flow and track seasonal performance. Our IVS is loaded with many advanced functions guaranteed to improve your business.

Experience Positive Business Impact Today

Real Time Notification

iPad / iPhone

NUUO Retail Solution enables you to receive real time push notification and playback right from your mobile devices. You will always be in control and be able to instantly review event footages when they happen. Our mobile viewing clients support Android and iOS, so no matter what device you are using you will never miss out on the important events.
